

FRUIT TREES

Varieties and sizes of Fruit Trees may be mixed in multiples of full bundles to reach the lowest price. Trees are sized by caliper, but generally range from 4-6' in height (height not guaranteed). They are lightly branched unless otherwise noted. **VARIETIES CODED CVI ARE CERTIFIED VIRUS INDEXED.**

Apple - semi-dwarf (expect 50-60% of standard size)

Size by Caliper	No. Per Bdl	Unit Prices		
		Bdl+	50+	100+
1/2"	5	10.25	10.00	9.40
5/8"	5	10.60	10.20	9.70
3/4"	5	11.35	11.10	10.85

Braeburn - CVI

Zone 5. Medium to large firm fruit, orange-red blush over yellow-green, tangy, crisp, very juicy, sweet flavor. Excellent fresh eating/cooking. Good keeper. Ripens October to November.

Cameo® - CVI

Zone 5. Choice for excellence in fresh eating with crisp texture and sweet juicy flavor. Fruit is bright red striped over creamy orange. This newer selection is rapidly becoming a favorite, and is now among the top ten most grown apples in Washington and other parts of the U.S. Add 50¢ per plant for royalty.

Fuji - CVI

Zone 6. Yellow-green fruit covered with orangish red flush, darker stripes. Crisp texture, juicy, slightly subacid flavor. Ripens September to late October.

Gala - CVI

Zone 5. An apple with great fruit qualities and superior red color. Fruit colors early with dark red striping over solid red undercolor. Good pollinator with mid-season bloom.

Granny Smith - CVI

Zone 5. Winter apple, late keeping. Shiny green tart, crisp fruit.

Haralson

Zone 3. Highly recommended winter hardy Apple. Fruit is striped red, juicy. Medium size; ripens September to October. Some resistance to Fireblight and Cedar Apple Rust. Vigorous tree, heavy fruit production.

Idared - CVI

Zone 4. Large, highly colored red apple. Good keeper and heavy annual bearer. For desserts and sauce.

Liberty - CVI

Zone 4. Medium to large shiny red fruit. Good fresh, cooked or canned. Crisp and juicy. Excellent storage quality. Heavy, annual bearing requires thinning to develop fruit size. Self-fruitful. September/October ripening. Highly disease resistant.

Northern Spy - CVI

Zone 4. Very juicy, crisp, tender, distinctive flavor for dessert or culinary uses. An excellent keeper. Comes into bearing rather late.

Red McIntosh - CVI

Zone 4. One of the most popular apples. Bright to dark red skin over sweet, crisp, sub-acid white flesh. Tart spicy flavor, wonderful aroma, both for fresh and cooking. Ripens in September. Cedar Apple Rust resistant. Trees have survived -45°F.

Sweet Sixteen

Zone 4. High sugar content and aromatic, firm juicy flesh are prized qualities of this outstanding dessert variety. Dependable annual crops ripen in mid-October. Resistant to scab and Fireblight. Add 35¢ per plant for royalty.

Apricot

Size by Caliper	No. Per Bdl	Unit Prices		
		Bdl+	50+	100+
1/2"	5	11.00	10.00	9.50
5/8"	5	11.50	10.90	10.25
3/4"	5	12.00	11.60	11.00

Rival - CVI

Zone 5. Large, fine textured, deep orange fruit with mild to slightly tart flavor. Developed by Washington State University. Heavy crop production and self-fertile.

Moorpark - CVI

To 10', Zone 4. Very large, sweet, juicy deep orange flesh. Smooth golden-yellow skin with orange-red blush. Excellent for fresh eating, canning or drying. Long ripening period, early July to late August. Self-fertile.

Cherry

Size by Caliper	No. Per Bdl	Unit Prices		
		Bdl+	50+	100+
1/2"	5	11.00	10.00	9.50
5/8"	5	11.50	10.90	10.25
3/4"	5	12.00	11.60	11.00

Montmorency - CVI

To 15', Zone 4. Pie cherry favorite, medium to large tart fruit. Requires well-drained/aerated soils. Self-fertile.

Rainier - CVI

Zone 5. Heavy and early bearing, sweet yellow blushed red cherry. Vigorous, heat tolerant tree. Fruit keeps well after harvest. Ripens in July. Needs cross pollination with Bing, Lambert or Stella.

Royal Ann - CVI

Zone 5. Large, sweet, juicy, yellow blushed red fruit. Excellent for fresh eating or processing. Heavy annual crops. Pollinate with Montmorency, Stella or Van.

Stella - CVI

To 30', Zone 5. Good producer of large, dark red, juicy sweet fruit. Ripens mid-June. Self-fertile and is a good pollinator for other sweet cherries.

Fruit Tree Virus Testing:

We offer fruit tree varieties which are propagated using Certified Virus Indexed (CVI) budwood and rootstocks which are grown from certified seed. Clonal rootstocks are certified virus indexed and meet the applicable official standards for virus certification. Seedling apple and pear rootstocks are considered to be inherently free from seed transmitted viruses.

Peach

Size by Caliper	No. Per Bdl	Bdl+	Unit Prices	
			50+	100+
1/2"	5	11.00	10.00	9.50
5/8"	5	11.50	10.90	10.25
3/4"	5	12.00	11.60	11.00

Elberta - CVI

Zone 5. Large, yellow blushed red fruit. Juicy, flavorful freestone flesh. Ripens from late July to mid-September (in cold climates). Good for fresh, canning freezing and jam. Self-fertile and a good pollinator for other peaches.

Red Haven - CVI

Zone 5. Favorite early variety. Medium, nearly fuzzless red fruit with firm yellow freestone flesh. Excellent fresh, canning and freezing quality. Abundant cropping requires thinning. Ripens late June to early August. Self-fertile.

Reliance - CVI

Zone 5. One of the best freestone peaches for colder locations. Red blush over yellow. Juicy yellow flesh, good for fresh eating and processing. Ripens medium size fruit in late July. Self-fertile.

Pear

Size by Caliper	No. Per Bdl	Bdl+	Unit Prices	
			50+	100+
1/2"	5	11.10	10.45	10.00
5/8"	5	11.65	10.95	10.50
3/4"	5	11.95	11.30	10.80

Red Bartlett - CVI

Zone 5. Traditional Bartlett Pear form and flavor with a wine-red color. Known for juicy flesh and delicious aroma. Fruit should be picked when fully mature but before ripe. Ripen after harvest. Good keeper.

Plum

Size by Caliper	No. Per Bdl	Bdl+	Unit Prices	
			50+	100+
1/2"	5	11.00	10.00	9.50
5/8"	5	11.50	10.90	10.25
3/4"	5	12.00	11.60	11.00

Italian Prune - CVI

Zone 5. Deep purple fruit with golden flesh. Oval shape and freestone character make this a favorite for fresh eating, canning or drying as a prune. Fruit ripens in mid-August. Trees generally bear within 3-5 years and will yield heavy crops of fruit. Pollinator needed.

Santa Rosa - CVI

Zone 5. Produces annual crops of excellent quality, purple-red, clingstone fruit in July. Good keeper, fresh or canned. Heavy bearer, partially self-fruitful, best with another Japanese type plum nearby. Developed by Luther Burbank in Santa Rosa, California.

Stanley Prune - CVI

Zone 5. This prune plum variety has long been a freestone favorite. 'Stanley' fruit is deep purple with yellow-green flesh and sweet flavor. The tree bears young and heavily. Fruit ripens around Labor Day and is excellent for fresh eating or preserving by either drying or canning.

***Cross pollination may be required
for fruit production. Contact our
sales staff for proper selection.***
